Used Oil Analysis(UOA) Project Details :

- This Portal is being developed for public service for analyzing oil health, oil contamination and machine wear. The purpose of an oil analysis program is to verify that a lubricated machine is operating according to expectations. When an abnormal condition or parameter is identified through oil analysis, immediate actions can be taken to correct the root cause or to mitigate a developing failure.
- The great benefit of this service is that it allows owners/operators to improve the equipment reliability by establishing effective maintenance schedules. This results in reduction of maintenance costs and improved equipment

reliability.
